

TOTE TANK

for sales & rental

With the same footprint of a pallet, a 550 gallon Tote tank can store up to 2000 litre of liquid by comparison with 800 litre per pallet of drums. Manufactured using Steel (various SS304, SS316/SS316L or Carbon Steel) materials, the equipment is built to last. This product helps chemical companies to minimize the cost per litre in terms of the delivery of chemicals. After going through all the stringent compliance protocol (UN 31A) the tanks can be re-use and have to go through a mandatory leak test every 18 month, drums or composite IBCs on the other hand had to go a mandatory disposal protocol. Users will have an immediate intangible impact and a positive monetary impact either through outright purchase or rental.

Our Totetanks meets the following United Nations (UN) and US Department of Transport (DOT) qualifications:

- UN/DOT UN31A permits the shipment of flammable and combustible liquids authorized by Title 49 CFR for land and sea transportation of hazardous liquid materials of packaging groups II and III.
- Allowable (per DOT) modes of transportation: motor vehicle, rail freight, cargo vessel, or air freight. The equipments are manufactured to UN specification at an ISO 9001:2008 certified manufacturing plant. NMFC Item 21032, Sub 1, Class 125

SPECIFICATIONS

Nominal Capacity	Nominal Width	Nominal Length	Nominal Height	Approximate Tare Weight	Max Gross Weight	UN Marking
120 gallon.(454)	42" (1066 mm)	48" (1219 mm)	24-1/2" (622 mm)	296 lbs (134 kg)	2005 lbs (1000 kg)	UN 31A/Y [*]
250 gallon.(965)	42" (1066 mm)	42" (1066 mm)	45" (1143 mm)	405 lbs (183 kg)	4453 lbs (2020 kg)	UN 31A/Y
300 gallon.(1135)	42" (1066 mm)	48" (1219 mm)	45" (1143 mm)	440 lbs (197 kg)	5203 lbs (2360 kg)	UN 31A/Y
